The overall objective is to reduce the flood risk through reforestation restoration along the Danube. The specific objectives are:
- to develop a common approach on the increase of water storage capacity during floods, from upstream to downstream along the Danube, and
- to contribute to the implementation of the EU Floods Directive, Water Framework Directive, Biodiversity and Climate policy, and the 2030 Strategy for inclusive green transformation among Danube basin countries.

**Project Area**: Southern Europe

- **Project Title**: NILC - Invitation of Eleven Environability Polyeviation Project (Environment/Politics)
  - **Leading Partner**: WRI

**Reference Period**: Project is under implementation

**Project Description**: The main objective of the project is to promote the environmental quality of the territory degraded by mining in the Danube region by developing integrated solutions and the research infrastructure for an integrated use and the conservation, landscape management and regional development.

**Specific Objectives**: Specific objectives. Development Foster Market for Ecotourism Development in SRB Ramsar Sites as a policy solution for heritage in the DRB and its role for the sustainable development; creating and developing the DF knowledge base and DF WIKI concerning knowledge about natural and cultural specificities of children from MRC, and eventually, to increase their educational level.

**Results of Implementation**: They will develop educational programs and awareness-raising actions for pedagogical staff, children from marginalized Roma communities in several countries of the Danube Region and in the UK. For this goal, involving children is an essential part of the educational content, which is included in the project. The project will focus on the socio-economic and educational aspects (incl. environmental) aspects, research roadmaps and training, energy demand and market analysis. The project will also work to foster an integrated approach to the sustainable development of the Danube Region, including initiatives for the protection of biodiversity, landscapes, and cultural resources, as well as the development of sustainable tourism.

**Status**: Project is under implementation

22 PA 08 C1 Transport-logistics Centre Vála
Slovakia

The overall goal is to boost prosperity and strengthen Europe’s position as a global economic power by better integrating the region into the global economy. The project aims to create a platform for the exchange of best practices, to develop business and innovation opportunities, and to improve the regional economy. By investing in infrastructure, education, and innovation, the project seeks to enhance the competitiveness and attractiveness of the region for foreign investment and trade. Through the promotion of smart specialisation strategies and the development of clusters, the project aims to foster new business and job creation, while also improving the quality of life for residents. The project is expected to contribute to the diversification of the regional economy and to create a more resilient and sustainable future for the region. (ongoing)
